

THINK BOLD. CREATE ARTISTICALLY. LIVE PASSIONATELY.

H. Studio encompasses all these emotions and ideas. We attempt to integrate style, color, and a love of beautiful design into your world and ours.

> about us

H. STUDIO was started in 1991 and has built an international reputation for the innovation of its designs, the quality of its artwork, and the incredible range of products it offers.

Since it's inception over 15 years ago, H. Studio has symbolized an entirely new vision in art, and invented a completely unique look separate from pre-existing industry standards. Over the years, we have brought color, art, function, movement, and style to many people in countries around the world.

H. Studio is composed entirely of master artist Shlomi Haziza's work. He brings vision and design to life with his striking sculptures and contemporary functional art. His distinctive style can be appreciated in his ever-evolving collection of sculptures, pedestals, art, furniture, accessories, rugs, lighting, waterfalls, fashion, and more.

Based in Los Angeles, H. Studio is a world leader in art, design, color, and innovation. With over 100 artisans, thousands of combined hours of experience, and more than 15 years of creating designs and servicing customers around the world, our team handles products from the initial vision to the final touches.

We also offer special effects, turning ideas into new products, using patented and copyrighted unique and original artwork, exceptional handmade finishes, the most world-renowned raw materials available, and an exclusive proprietary bonding formula which we create ourselves.

Our unique approach stems from our absolute dedication to creativity and passionate involvement in bringing beauty to the world around us. H. Studio brings people together from many parts of the world and many areas of expertise. Many products we show on these pages were manufactured a stone's throw from our in-house creative department, where the entire catalog you see before you was photographed and designed. We live and work with a drive and energy that flows from our designs to our showrooms and into the lifestyle we promote.
